Comments: I'm writing to oppose the Sandia Peak Ski Area Mountain Coaster #56985. I think it's absurd and unethical to go forward with this development without an Environmental Assessment or an Environmental Impact Statement. Because when I think "rollercoaster on top of a mountain," my first thought is "minimal amount of new disturbances," right? That was sarcasm, in case you couldn't tell. How do you think people are going to get to the top of the mountain to go on the roller coaster? Is the roller coaster going to *make noise*? Might that amount to more than a minimal amount of new disturbance? Honestly. Don't build a roller coaster on top of Sandia Peak. In case you've forgotten, the mountain is sacred to the Pueblo of Sandia. Maybe access to historical homelands is more important than a roller coaster? Just maybe?
