Comments: I do not support the building of a roller coaster in the Sandia Mountains. This land is sacred to the Pueblo of Sandia and it's community members and they have had enough hurt from losing their mountains to the Forest Service in the 90s. The noise, the structure to be built, and the increase in recreation would cause harm to the land and all the animals that inhabit the land there. There is absolutely no need or reason to build a roller coaster here. Indigenous rights need to be respected. Indigenous people need to be respected. This sacred land needs to be respected.
