Comments: I am against the building of this roller coaster. The fact that there is a lack of transparency and accountability regarding the regulations under the EPA is a major reason I don't support this. Another reason is this is sacred land- you need to honor it and honor the original inhabitants beliefs and choices regarding the land. And further ignoring the negative treatment this land for another environmentally unregulated "attraction" is destroying what makes New Mexico beautiful : the land and the open space and the history and the people who were here first. Outdoor spaces need to be cared for not abused and destroyed.
