Title:

Comments: The Sandia mountain roller coaster project should not be exempt from an environmental impact statement/assessment. In no sense is it the same as what already exists on the mountain, at the very least it will be a substantial and disruptive construction project.

A special use permit on forest land should not grant the Aburuzo's carte blanche to do whatever they want on the land.

Please do not allow the project to go forward without a specific environmental impact assesment, and without considering input from the community.
