Comments: This area in summer has, up until now, been a fine location for quiet walking, relaxation and wildlife viewing.

Over the years, birds I have encountered include at least three species of owl, and Northern Goshawks among others.

I am not entirely certain what a "Mountain Coaster" is. I can only imagine. It will be very sad if this area is turned into a fairground attraction. More traffic, noise, litter, and the kinds of behavior we see when those who do not really appreciate their environment visit for excitement, or boredom.
