Comments: I thoroughly oppose the idea of putting a mountain coaster at Sandia Peak ski area. As it is, the traffic up the crest road is busy and sometimes dangerous-this could increase that by a significant amount. It will also increase the impact on the environment and ecosystem-noise pollution, light pollution, trash, etc. but the most important reason that I oppose this project is because it further desecrates a sacred site for Indigenous Tiwa, Tewa, and other Pueblo people. This land was stolen and it is still occupied by the settler government of the United States. You have no right to build this without the free, prior, and informed consent of all Indigenous people's who would be affected. Do not allow this project to continue.
