Comments: I completely support funding going to our beautiful mountains for upkeep of hiking and biking trails, wildlife preservation, and improvements made to our existing amenities. I wholeheartedly DO NOT support the construction of a structure that will not only destroy the habitat for hundreds of animals, but will also attract large amounts of people who have no respect for the wilderness to come en masse from the city for the thrill of a roller coaster. Not only will this increase traffic, litter and accidents, but it will lead to further destruction of an area that is treasured by outdoor enthusiasts. Also please consider the increase risk for wildfires that will result from the large numbers of people on the mountain. Please do not allow this roller coaster to be constructed. It is a complete disservice to the land, wildlife and the people who enjoy being in the mountains.
