Comments: Hello. I oppose the construction of a mountain coaster. I would like to ask whoever needs to approve this project to deeply consider who a mountain coaster would serve. As a member of the public who loves to visit mountains and wild spaces, I can assure you that a coaster would be a deterrent. I go to the mountains to test myself physically, soak up nature to recharge myself emotionally, and to experience time with friends with all of the material world stripped away. I go to get relief from noise and air and light pollution (there are so few quiet places left!!). Let be known that I also love roller coasters but I would much rather visit them in a theme park. A mountain doesn't need entertainment options; they foster creativity and thoughtfulness and resourcefulness. A great book on the concrete health benefits/Health necessity of wildness is called the Nature Fix. I highly recommend it! Thanks!
