Comments: As a New Mexican, I know how quintessential the Sandia's are to our beautiful landscape. Why should we turn a beautiful landscape that the public can enjoy for free into a profit-making machine? This is a place of solace, where one can get away from the constant rush of the industrialized world, and to just be in peace on the mountains. Why would we want to bring our man-made profit-generating worker-exploiting inventions to the natural sphere?
