Title:

Comments: My children and I spend our summers with my parents in Northern New Mexico; having grown up there and still spending 1/4 of our year there, I feel that preserving the land for my children (9, 6 and 3) is of the utmost importance to our family. I hope that the forest service does not move forward on any large scale projects-like the one proposed-without addressing the potential long term environmental impact of those decisions through impact reports that are shared with the community at large.

Thank you for your consideration.
