Comments: I object to the further destruction of wilderness in this area. Just because an individual or entity retains ownership of a property, that does not guarantee their right to derive a profit from said property. There is a diminishing amount of natural space in that area and this project would further negatively impact not just the area of the project, but the surrounding area and wildlife as well. This attraction will also increase traffic on the route to the summit, further impacting wildlife and air quality.

Please stop this further destruction of the Sandia wilderness!
