Comments: As a lifelong NM resident and deep appreciator of both the sandia mountains and the culture of Albuquerque, I oppose the construction of the Sandia Mountian roller coaster. I disapprove of the invasive and enduring nature of this project. The structures on the mountain will be there long after the human beings. There are plenty of ways to recreate and access the sandias, and moving forward with something lasting and potentially destructive to the place many native people in the area hold as sacred is irresponsible and disrespectful.
