Title:

Comments: Building a rollercoaster in the Sandias would be a very bad idea. It would have a negative impact on the environment through sound, littering, and pollution. Wildlife needs to have a quiet environment to thrive. Excess noise from the rollercoaster would disrupt wildlife patterns in the forest. Ignorant tourist will cause litter and other forms of pollution that would harm the environment and wildlife of the forest. Please do not build a rollercoaster for the sake of the environment and the people that currently enjoy it in peace.
