First name: Sara

Last name: Lee

Organization:

Title:

Comments: There are three primary reasons this project should not move forward. Something of this nature needs to have an Environmental Assessment or Environmental Impact Statement to determine its footprint. The long term effects of increased traffic, noise pollution, waste, contamination and displacement of wildlife needs to be considered as well. Finally, this mountain is of sacred significance to the people of the Pueblo of Sandia and should remain as untouched as possible.

Thank you for your help and consideration.
