Comments: Please, please, please do not do this. Please do not destroy what little wildlife and natural space our community has left. Reliable access to nature has been proven to lower crime rates and our children deserve to enjoy these spaces. How could you sleep with yourself knowing you've chosen profit over the health, safety, enjoyment, fulfillment, and peace of your community? History will not be kind to those who prioritize money - an empty, human-created construct - over the actual lives of the plants, animals, and people who live on this planet.
