Comments: Hello, as a native New Mexican I would like to vocally oppose this project. The effects of this roller coaster are both environmentally problematic since it will disrupt the mountains natural eco system, displace the animals living there, cause pollution and cause deforestation. In addition to this the sandia mountains are sacred to the indigenous peoples of this land and it is disrespectful and wrong to put a roller coaster there. I urge you all to not go through with this plan for the sake of the mountains ecosystem and the people who are the stewards of this land and oppose this project.
