Comments: Hi there,

I am writing to express my opposition to this project. There need to be impact studies to see how this would affect the ecosystem of the mountain. The volume of cars going up the mountain, plus the increased fire risk, both make this project sound like it could be pretty harmful to the forest. Furthermore, as this is land sacred to Sandia Pueblo, this is incredibly disrespectful. I'm not against fun. I just think this project is incredibly problematic.

Thanks for your time and consideration
