Comments: As an American citizen and someone who is concerned about our natural resources, I am outraged with what this plan would do. These mountains are part of our natural heritage in this country. Not to mention how important they are to the indigenous groups to whom they originally belong. Building upon them would be disastrous for our natural environment and the ecosystem services these mountains provide. It is utterly inappropriate to think of building on this site which is so important for the surrounding communities as well as the national population.
