Comments: I strongly oppose the plan to remove any horses.

No horses should be removed, period.

This is an outrage, especially since grazing cattle is allowed. Stop catering to the special interests of ranchers, this is unacceptable!

The only population control method ever should be PZP fertility control.

The use of electric cattle prods must be banned!

The public and true horse advocates must be involved in the protection of the horses. The American public loves the horses and want to see them safe.

No horse deaths or euthanasia should ever happen. This herd is under Federal protection! Leave these horses alone!
