Comments: Hello, I am commenting because I oppose the building of the Sandia Peak Ski Area Mountain Coaster. Building a roller coaster and concession building would bring increase of traffic to the area that will have lasting impact on the environment and wildlife. Car smog, noise pollution, increased litter, inappropriate wildlife feeding, and more are possible with introduction of a minature amusement center. How can this fall under a minimal amount of new disturbances? We are in a climate crisis. Every bit of wildlife & ennvironmental protection is necessary. The Pueblo of Sandia should be at the forefront of this discussion, and they should have final say.
