Title:

Comments: This project should not go forward under any circumstances without proper environmental assessments, permission from sandia pueblo as well as a much more transparent process throughout. This should not fall under any type of special use permit simply due to to scope of the project let alone all the other factors. Additionally, the amount of influx of unknown of people who are not likely to respect the wilderness combined with everything else more people in general will bring could be calamitous for the ecology and biosphere of the mountain. In it's current state I do not support this project whatsoever
