Comments: The mountains are meant to be a place to get away. Unfortunately humans continue to ruin these beautiful natural places. The mountain coaster would just be more of that. Decreasing natural beauty. Increasing traffic, pollution, litter, and just scarring our beautiful mountain. The types of people visiting this coaster will not be considerate of our mountain and will increase the wear and tear that this fragile environment cannot handle. We as humans need to think about a sustainable future, a mountain coaster does nothing for the long term preservation of these mountains for generations to come to enjoy. Not to mention the animals that call this place home. Please do not destroy more natural, beautiful places for no good reason!
