Comments: A resident of the city of Albuquerque, I am against the construction of a roller coaster on the beautiful Sandia Mountains. This does nothing but continue to disturb and harm natural environments. This installation is nothing short of a waste of resources, time, and money. This does not benefit the well being of locals nor the natural ecologies surrounding that area. I am deeply oppose against action that continue to violate and destroy environmental justice. Keep our gorgeous natural mountains out of useless contraption that only operate for the harm and exploitation of natural resources.

Best,

A.G.
