Comments: Please do not build a roller coaster on the Sandia Mountains. You need to complete, at the bare minimum, an Environmental Assessment or Environmental Impact Statement. The Sandias are sacred to the Pueblo people - have you engaged with their community about this? There is already enough tourist activity on the Sandias, and this roller coaster will cause even more disruption and damage to the sacred land, natural beauty, and ecosystem of the Sandias. A roller coaster seems like a desperate attempt to generate greater income from the tourism industry. The Sandias don't need more pollution from cars, more trash from visitors, and more disruption of sacred lands and wildlife. Please, keep roller coasters in the city and leave the wilderness alone.
