Comments: A mountain roller coaster would be utterly detrimental to the Sandia mountains. These areas should be protected from capitalistic ventures. A roller coaster will pollute the area- bringing more people into a delicate ecosystem, bringing sound pollution to a fragile and balanced peak. We saw our natural places get trashed with too many people during covid- we should not incentivize this kind of behaviour. This is sacred land that has been turned over for recreational purposes and a profit. DO NOT BUILD A ROLLER COASTER- it is not necessary.
