Comments: As an avid hiker and ally to Indigenous folks, I ask you to please not erect a roller coaster in the forests. Protecting the environment is a monstrous task outside of these well-maintained habitats. We can not allow capitalism to ruin yet another area, especially on stolen land and land that is so sacred to the people we stole it from. Furthermore, the building of this roller coaster has significant environmental impacts from the steel it would take to produce, transportation of these materials, deforestation to make room for it, and other things that I'm sure an environmental impact review would find. Please stop this completely unnecessary and harmful project.
