Comments: I'm fully against a project of this scope on the Sandia Mountains, and find it appalling that it's even being seriously considered.

Even though this land has a special use permit to operate as a ski area, the idea that a rollercoaster adds to this area in any meaningful way is absurd. If you're looking for something fun to do in the Summer, add a slide, a high ropes course, or something that isn't a giant, careening, large energy-consuming source of entertainment. My options are cheaper, just as useless, and allow us all to move on to enjoying what the Sandia Mountains ACTUALLY have to offer - a place to escape the city, enjoy nature, and get away from the loud noises of everyday life. And now, we'll have A ROLLER COASTER in the way of that.

While I'm relieved to know that - if the rollercoaster is implemented, which I absolutely 100% hope to GOD it is not, it would be in the same area as the ski slopes - I'm shocked it's being considered due to the impracticality of having a rollercoaster 10,000 feet above sea level, and the inconsistent weather on top of the mountain causing the coaster to likely not even be that usable.

Please, also consider the fact that the mountain is considered sacred land by locals who've been here far longer than the rollercoaster's hype will last, AND understand that there are many voiceless constituents that, if they had a voice, would STRONGLY oppose this project (nature, the environment, the mountain itself).

Thank you for submitting my comments on this project.
