Comments: I am commenting on the proposed Sandia peak rollercoaster project. As a member of the community I do not want this built. The potential impact on wildlife and the mountain ecosystem will be at risk with additional visitors, and tourists that do not respect and honor the mountain. The indigenous people, the protectors of this mountain and the elk, bear, deer, and other wildlife and plant and water ecology are to be prioritized and cared for. And I say no to having a rollercoaster built on the mountain.
