Title:

Comments: This land is sacred to the Pueblo of Sandia and shouldn't be disturbed. The construction of this roller coaster disturbs the local ecosystem and destroys habitat directly through the alteration of the land and through noise pollution. This would attract tourists who would further desecrate the ground and the gifts she provides to nurture us all. Please don't do this, we've already lost so much of our home as our world is paved over and our extended family of all the other organisms we share our home with are turned away. Please.
