Title:

Comments: A "mountain roller coaster"? I couldn't believe my eyes when I read about this. The mountains and land need preservation and conservation, not money-making amusements. They are perfect as they are. I do NOT support this absurd project and I feel extremely angry that someone(s) actually had the gall and the foolishness to dream up such nonsense, disrespect of the land, the animals and flora who inhabit it, and not least, the natives who consider this land sacred. Please drop this project!
