Comments: This coaster idea has far too many costs to ever be beneficial to the people of albuquerque. This is an eye sore a disruption to nature a source of pollution and land degradation and a ridiculous idea. Go to a theme park not a wildness where animals live. People enjoy the sandias as an escape to the closest version of wild near a city. A roller coaster really? It will benefit a few investors make little money for the city and be detrimental to all the rest. This is a horrible ridiculous idea. As a tax payer, voter, and citizen of new Mexico I oppose this absurd idea strongly.
