Comments: Building a roller coaster on national land sets a dangerous precedent for how we treat these lands. The noise, traffic, environmental impact, change to watershed, and trash from tourists will all be disrespectful to this land. Additionally, this land is sacred to the Pueblo people. Our country has already taken too much from indigenous peoples. We cannot continue to treat land and the wishes of indigenous groups so callously. Do not build this roller coaster. I can't believe I'm even having to say this. It's completely absurd.
