Comments: I strongly oppose the proposal for the "Sandia Peak Ski Area Mountain Coaster Project." Turning a mountain, sacred to its native people, refuge for humanity in the solace of nature, into a commercial theme park ride is abhorrent to imagine. This project represents a diminishment and not an enhancement of the original land and environment. Noise pollution, visual pollution and aesthetic pollution are the reasons I object. So little room is left in our lives for the sacred, places that respect the natural beauty and the rights of wildlife. Too much space is invaded by the profane. What next, a Ferris Wheel at Walden Pond? A Yosemite Sam ride in the meadows of Yosemite? Please turn this project down, and let us breathe a sigh of relief.
