Comments: Hello I am writing to voice my concerns for the mountain roller coaster that is proposed foot be built in the Sandias. There is no Environmental Impact Plan in or assessment in place so the effects to our fragile ecosystem have not been considered the indigenous people who the Sandias are sacred to have not be consulted through the proper channels. And finally who does this aim to benefit? Does it take precious resources like water away from locals in order to drive the tourism market and if so if that economic incentive enough for such things? I think we need to consider these things before going forward. Thanks for your time
