Title:

Comments: US Forest Service,

I was born and raised next those mountains. Grew up and had first memories in those mountains. With the world and its most beautiful and sacred places being disturbed by our present, why would you want that for the Sandip Mountains. New Mexico has always played a crucial role in maintaining its integrity. Do not be part of destroying one of the last great places we have.

I strongly appose the contraction of this new coaster.

Thank you,

Joel-
