Comments: Let native land remain natural! This coaster would be detrimental to the native people, the environment, and the wildlife. The construction and increased traffic will scare off wildlife that have only just returned. Increased noise pollution, litter, and cross contamination will skyrocket. The mountain can already be used for skiing, hiking, mountain biking, sledding, and other outdoor active recreational which contribute to wildlife disturbance and desecration of sacred land. Adding a passive "experience" for the sake of making money is outrageous and unnecessary. Please reconsider building this coaster. As a local citizen I am strongly opposed. Hear us!
