Comments: As a person who loves to travel to National forests and parks I am devastated to learn that a rollercoaster is being considered in the Sandia Mountains. This is not what wildlife preservation is about. Recreation is not more important than preserving natural landscapes. This roller coaster will have long term environmental impacts that I do not believe are being considered. I am deeply concerned that the rights of the Pueblo Nations are not being considered and more of their sacred land will be stolen from them. I implore you to reconsider this development.
