Comments: Good day, I'm writing you because I'm concerned about the project that looks for the construction of a rollercoaster in the Sandia mountains. I understand that it would be a great attraction and in the short term will bring a lot of financial benefits. Nevertheless, there are more significant issues to take into account. The main one being related to the environment. The destruction caused by the building of the rollercoaster, the constant noise once it's operating and the typical pollution due to trash and other objects will only scare wildlife and that will bring long term consequences to our ecosystem. The area already has an amusement park and we don't need to destroy nature more in order to have fun.
