Comments: This proposed idea would be awful for the Sandias, it's ecosystem, and those who actually use the mountains for recreation. The commodification of outdoor space is an issue at New Mexico's heart. And it's an issue that needs the curtain pulled back on. We can't even count on casual citizens use of the outdoors to be had without piles of litter strewn around campsites, trailheads, and the like since before quarantine began last year. We can't count on any education to the public for the idea of Leave No Trace by governing bodies like yours, how much worse can it get? Oh wait...It can, Roller coaster... your avarice is going to be our downfall. This land wasn't ours to begin with and now you want to make more profit it. I'm ashamed and disgusted by your proposal.
