Comments: To Whom it Concerns,

Please maintain the Sandias as a place of natural beauty and do not allow the Mountain Coaster. The coaster will be within view and earshot of beloved trails such as the Crest and 10K. I value the quiet sounds of nature, wildlife viewing, and aesthetics of the natural landscape, and these things in short supply in our increasingly developed world must be protected.

The increase in traffic this development will most likely cause will be detrimental to the natural beauty of the area.

The traffic capacity of the area must be clearly studied and addressed by the Forest Service.

-- IF the USFS issues a categorical exclusion there will be No analysis on wildlife including threatened or endangered species like: New Mexico meadow jumping mouse; Mexican spotted owl; Southwestern willow flycatcher; and Yellow-billed cuckoo. The Forest Service it must complete an Environmental Assessment. This assessment must include the cutting of tress as well, which could also impact drought conditions and climate change.

I am opposed to the construction of the mountain coaster.

In cooperation

Gail Robin Seydel
