Comments: To whom it may concern,

I am writing to request an extension for this comment period and more time for others to respond. As a Tewa citizen, the Sandia mountain range is sacred traditional territory stolen from the First Peoples of these lands. Any development that does not gain consent from the land, animals, ecologies and peoples of this place is a desecration to these grandparent mountains. There must be government to government consult, an EIS statement, and public hearings. I pray in the direction of this mountain daily visualizing my love and care, and still invoke its original name in my language. I am opposed to this roller coaster and an increase of non-conscious tourists crawling and polluting our southern cathedral. I am against the irreverence that constructing this would bring to our beloved mountain, OkhuuPin'. Sincerely, Beata Tsosie
