Title:

Comments: Salmon are still dying as they hit the unshaded, cattle-silted, overheated waters of Eastern Washington. We can't afford to degrade habitat anywhere until its safe for salmon everywhere. I've quit fishing until I hear the salmon are in healthy stable recovery. Will it be in my lifetime? You on the front lines hold all our futures, salmon and fishers alike, in your hands. Please err on the side of caution. Thank you.
