Title:

Comments: I am against the building of this coaster. Firstly, because of environmental concerns caused by increased traffic that the coaster (and restaurant/food station) will bring and will put animal and plant communities at risk. We dont need development when more and more natural spaces are being destroyed for entertainment of people. Secondly because we are on native land and I havent heard any evidence that first peoples whose land this is were consulted about or approved the construction and implementation of this project. In this ecological crisis we are living in, indigenous peoples must be at the forefront of making decisions about what is buolt/happens on their traditional land. Respect for indigenous knowledge and respect for a healthy environment for future generations is not part of this project, and therefore should not happen.
