First name: Bambi
Last name: Muller
Organization:
Title:
Comments: Please reconsider the removal of our iconic majestic wild horses. They are deserving of our protection. They deserve the right to exist on the public land we pay taxes for. Please consider humane management practices such as reproduction control. Horses are here animals they are families. Removal and separation causes great stress on these magnificent creatures. I want them to remain they are a part of the West's history and we should value our history.
