Title:

Comments: Albuquerque has an amusement park with a roller coaster already (Cliff's) and the idea of turning our beautiful, accessible mountain retreat--with its hiking trails, majestic vistas, wildlife, and, best of all, opportunities for silence and solitude into a second amusement park is...awful. Please don't let this happen. Next thing there will be a water park and then a paint ball course and on and on. If we have learned anything about wild spaces in the last forty years its that they are precious and constantly under pressure from developers. Please preserve the Sandia Wilderness as it exists.

Thank you.
