Dear Sir,

My name is Jean Collinet.

I'm the head of MeltingSpot organisation. We are based in Switzerland and organize ski trip around the world. Every other year we come to Cordova with a group of skier, we're between 16 and 24 skiers, and usually stay for 2 weeks.

- In the past we had several occasion where we could fly and ski, but the wind had damage the snow so bad that people went back home with the feeling they didn't ski anything. Those ones are lost clients. Having access to a forest protected area would be a game changer, and provide good skiing even if the wind had blown the mountains. it would 100% make things easier for us to bring more clients, as they would be more guaranteed to have good snow.

- Before knowing PNH none of us knew Cordova. When we come we always make video. The most view we had was with our sponsor, the Millet french clothes company, 430 000 view. They even named a full winter collection cordova.

The people I bring love hanging Cordova and their shops. The even recognize us every time we come back, skiing is the goal, but the town is a big part of the trip, like the ski resort and the harbor. We all love this little town.

- We've been heliskiing almost everywhere in the world, from russia to canada via south america, kamchatka, Ouzbekistan Himalaya etc. PNH is for us the most professionnal company we deal with and one of the safest as well. We love working with them.

- To finish I'm convinced it would be a big plus if we could ski this forest, it would make things much easier to bring clients in. And we come from far away !

Best regards

jean
