Comments: Please leave the Heber horses alone. They are not hurting anyone.

"Apache-Sitgreaves National Forests leadership has argued that the current amount of horses poses a threat to the resources in the area and creates conflicts with landowners." Whose resources? Conflicts with whom? Is the answer to both questions, the wealthy ranch owners who want their cattle to have access to cheap grazing land? Do you think people are stupid?

Perhaps the party(parties) responsible for needlessly slaughtering these horses will mistake their cattle for horses.

Please leave the horses alone!
