Title:

Comments: Please do not clear cut any more of the forest. There are countless studies highlighting the devastating impact of that practice, I would hope i do no need to tell you that, or else i would worry about your qualifications for the job you are working. Just do the right thing and use less harsh alternative methods for harvesting wood. Saving little pieces now could have a huge impact for the children of generations to come, please consider that when deciding how much of our ecosystems you wish to profit off of. Thank you for your time, have a nice day.
