Comments: What a wonderful area. I have appreciated and enjoyed this very special place for decades.

3,000 acres of critical forest and forest habitat logged? This seems like the worst possible use that the Forest Service could consider.

Please provide a full Environmental Impact Statement (EIS) to ensure that if some form of this use is permitted, that it is done so responsibly and with all the potential negative impacts taken into consideration. This is a no-brainer. Please don't sell out the citizens you work for because of other pressures to make this happen. Something as huge and damaging as this needs to be handled very carefully and properly.

Thanks for your consideration. Please register me as an interested party keep me informed.
