Comments:

Hi my name is Gus Ringo and this project is important to me because I love that forest. Please conduct an EIS and engage in option two rather than option 1. Clear cutting has clear environmental impacts from contributing to an alarming amount of erosion, which leads to mudslides, and also releasing tons of greenhouse gases into the atmosphere, which causes global warming. Not to mention it violates a treaty with the Native Americans, which in the 21st century the reputation of treaty breaker is not a reputation the USA desires to keep up. Thank you.
